INDEX

ABSORPTION, gastrointestinal, of calcium and magnesium in the rat, effects of antibiotics on, 573.
Absorption, gastrointestinal, of calcium and magnesium in the rat, effects of antibiotics on, 573.
Alfalfa hay, comparison of the nutritive value of with brome grass and reed canary grass hays at various levels of nitrogen fertilization, 383.
ALLEN, R. S. See Frape, D. L., 189.
ALLISON, J. B. See Taylor, M. W., 7.
ALLRED, J. B. See Kratzer, F. H., 313.
American Institute of Nutrition, Awards, Invitations for Nominations for 1960, 683.
Fellows, Invitation for Nominations for 1960, 686.
Amino acid(s) balance and imbalance. I. Dietary level of protein and amino acid imbalance, 405.
—— composition of garden peas and lima beans, effect of irradiation sterilization on nutritive value of, 419.
——, essential, egg protein as a source of. Requirement for nitrogen balance in young adults studied at two levels of nitrogen intake, 203.
——, urinary excretion of by the same women during and after pregnancy, 583.
ANDERSON, S. C. See Wells, W. W., 541.
ANDRUS, S. B. See Gershoff, S. N., 75.
DE ANGELIS, R. C. See Carvalho da Silva, A., 213.
Antibiotics, effect of on the gastrointestinal absorption of calcium and magnesium in the rat, 573.
Ascorbic acid (serum) concentration of women, effect of high environmental temperature on, 35.
Atherosclerosis in rabbits, increased severity of on a lactose-containing diet, 541.

BAKER, N. See Tubis, M., 595.
BARNES, R. H., AND G. FIALA. Effects of the prevention of coprophagy in the rat. VI. Vitamin K, 603.
BARNES, R. H., S. TUTHILL, E. KWONG AND G. FIALA. Effects of the prevention of coprophagy in the rat. V. Essential fatty acid deficiency, 121.
BARNHART, F. W. See Tomarelli, R. M., 265.
BARRON, G. P. See Swift, R. W., 281.
BARRY, M. E., See Swift, R. M., 281.
BARTH, K. M., G. W. VANDER NOOT AND J. L. CASON. A comparison of the nutritive value of alfalfa hay with brome grass and canary grass hays at various levels of nitrogen fertilization, 383.
Beans, lima, effect of irradiation sterilization on the nutritive value of, 419.
BIERI, J. G. See French, C. E., (Sup. 2) 1.
BLAHD, W. H. See Tubis, M., 595.
BRIGGS, G. M. See Fox, M. R. S., 371.
Brome grass and canary grass hays, comparison of the nutritive value of with that of alfalfa hay at various levels of nitrogen fertilization, 383.
BROWN, M. L. See Pike, R. L., 551.
BUZINA, R. See Horvat, A., 647.
BUZINA, R., P. MILUTINOVIĆ, V. VIDOVIĆ, H. MAVER AND A. HORVAT. Endemic goitre of the island of Krk studied with I^{131}, 465.
B vitamin(s), effects of a deficiency of on salt toxicity in the rat, 231.
—— interrelationships in growing rats, studies on, 473.

CALCIUM and magnesium, gastrointestinal absorption of in the rat, effect of antibiotics on, 573.
Carbohydrate and fat content of the diet, effect of upon the riboflavin requirement of the cat, 75.
— (fat and) utilization of dietary protein and energy as affected by, 281.
CARVALHO, DA SILVA, A., A. B. FAJER, R. C. DE ANGELIS, M. A. PONTES, A. M. GIESBRECHT AND R. FRIED. The domestic cat as a laboratory animal for experimental nutrition studies. VII. Pyridoxine deficiency, 213.
CASON, J. L. See Barth, K. M., 383.
Cat(s), domestic, as a laboratory animal for experimental nutrition studies. VII. Pyridoxine deficiency, 213.
—, riboflavin requirement of, effect of the carbohydrate and fat content of the diet upon, 75.
CATRON, D. V. See Diaz, F., 131; Frape, D. L., 173; 189; 333.
Cesium-134 and potassium-42 excretion in sheep, influence of dietary potassium and sodium on, 655.
Chick(s) growth, studies on the effect of quantity and type of fat on, 615.
—, guinea pig and hamster, hydroxyanthranilic acid as a source of niacin in the diets of, 17.
— liver, L-cysteine desulfhydrase activity in, further observations on factors affecting, 671.
—, lysine requirement of, growth rate and, 429.
—, potassium requirement of, effect of protein and energy on, 89.
—, vitamin E-deficient, alterations in some biochemical constituents of skeletal muscle in, 359.
Chinook salmon diet, nitrogen supplements for. Nutrition of salmonoid fishes. VII., 663.
Cholesterol fatty livers, effect of cold environment on. Nutrition studies in the cold. III., 495.
Choline (Methionine, homocystine), folic acid and vitamin B_{12} in the nutrition of the mouse, 141.
CHOUDHURY, R. B. R., AND R. REISER. Interconversions of polyunsaturated fatty acids by the laying hen, 457.
COHEN, N. L. See Williams, M. A., 25.
COMAR, C. L. See Lengemann, F. W., 443.
CONSOLAZIO, C. F. See French, C. E., (Sup. 2) 1.
COOMBS, G. F. See Williams, R. R., (Sup. 1) 1.

Coprophagy in the rat, effects of the prevention of. V. Essential fatty acid deficiency, 121; VI, Vitamin K, 603.
Cor. oil, nutritional effect of polymers isolated from thermally oxidized, 101.
— —, thermally oxidized, nutritional effect of polymers isolated from, 101.
COWAN, R. L. See Swift, R. W., 281.
L-Cysteine desulfhydrase activity in chick liver, further observations on factors affecting, 671.

DAM, R. See Leach, R. M., Jr., 89.
DAM, R., R. M. LEACH, JR., T. S. NELSON, L. C. NORRIS AND F. W. HILL. Studies on the effect of quantity and type of fat on chick growth, 615.
D'AMATO, E. See Tomarelli, R. M., 265.
DAVIS, P. N. See Kratzer, F. H., 313.
DECKER, R. H., AND L. M. HENDERSON. Hydroxyanthranilic acid as a source of niacin in the diets of the chick, guinea pig and hamster, 17.
DELONG, D. C., J. E. HALVER AND E. T. MERTZ. Nutrition of salmonoid fishes. VII. Nitrogen supplements for chinook salmon diets, 663.
DERBY, M. B. See Wertz, A. W., 583.
DIAZ, F., V. C. SPEER, P. G. HOMEYER, V. W. HAYS AND D. V. CATRON. Comparative performances of baby pigs fed infant and baby pig diets, 131.
Diet(s), carbohydrate and fat content of, effect upon the riboflavin requirement of the cat, 75.
—, chinook salmon, nitrogen supplements for. Nutrition of salmonoid fishes. VII., 663.
—, infant and baby pig, comparative performances of baby pigs fed, 131.
—, lactose-containing, increased severity of atherosclerosis in rabbits on, 541.
—, purified-type, salt mixtures for. II. Effects of salts on the Maillard browning reaction, 289.
Digestion, gastrointestinal, of fat in dogs fed triglycerides, partial glycerides and free fatty acids, 393.
Dogs fed triglycerides, partial glycerides and free fatty acids, gastrointestinal digestion of fat in, 393.
Dystrophia muscularis, vitamin therapy in mice with hereditary, 595.

EGG PROTEIN as a source of the essential amino acids. Requirement for nitrogen balance in young adults studied at two levels of nitrogen intake, 203.
Energy, (protein and) dietary, utilization of as affected by fat and carbohydrate, 281.
Ethylenediaminetetraacetic acid and autoclaved soybean protein, effect of on the biological availability of dietary zinc for turkey poults, 313.
EVERSON, G. J., L. S. HURLEY AND J. F. GEIGER. Manganese deficiency in the guinea pig, 49.

FAJER, A. B. See Carvalho da Silva, A., 213.
Fat(s) and carbohydrate, utilization of dietary protein and energy as affected by, 281.
— (defatted liver residue and), comparative antithyrotoxic activities of. The antithyrotoxic factor of liver. II., 251.
— (carbohydrate and) content of the diet, effect of upon the riboflavin requirement of the cat, 75.
— deficiency, effect of on pituitary-gonad relationships, 509.
—, dietary, effect of on the development of vitamin B_6 deficiency in the rat, 25.
— —, effect of on vitamin B_{12}-methionine interrelationships, 371.
—, gastrointestinal digestion of in dogs fed triglycerides, partial glycerides and free fatty acids, 393.
—, saturated, effect of upon essential fatty acid metabolism in the rat, 155.
—, studies on the effect of quantity and type of on chick growth, 615.
Fatty acid(s), free (triglycerides, partial glycerides and), gastrointestinal digestion of fat in dogs fed, 393.
— — (essential) deficiency. Effect of the prevention of coprophagy in the rat. V., 121.
— — — metabolism in the rat, effect of saturated fat upon, 155.
— —, polyunsaturated, interconversions of by the laying hen, 457.
FEELEY, R. J. See Swendseid, M. E., 203.
FIALA, G. See Barnes, R. H., 121: 603.
FINERTY, J. C. See Panos, T. C., 509.
Fishes, salmonoid, nutrition of. VII. Nitrogen supplements for chinook salmon diets, 663.
FISHER, K. H. See Swift, R. W., 281.
FLICK, D. F. See Vahouny, G. V., 495.
Fluoride(sodium)-fed rat, metabolic studies on, 109.
Folic acid (Methionine, homocystine, choline) and vitamin B_{12} in the nutrition of the mouse, 141.
Food(s) consumption of riboflavin-deficient rats, effect of low environmental temperature on weight and, 485.
—, nutritive value of, effect of radiation sterilization on. IV. On the amino acid composition of garden peas and lima beans, 419.
FOX, M. R. S., AND O. MICHELSEN. Salt mixtures for purified-type diets. II. Effects of salts on the Maillard browning reaction, 289.
FOX, M. R. S., L. O. ORTIZ AND G. M. BRIGGS. The effect of dietary fat on vitamin B_{12}-methionine interrelationships, 371.
FRAPE, D. L., V. C. SPEER, V. W. HAYS AND D. V. CATRON. Thyroid function in the young pig and its relationship with vitamin A, 333.
— — — —. The vitamin A requirement of the baby pig, 173.
FRAPE, D. L., R. S. ALLEN, V. C. SPEER, V. W. HAYS AND D. V. CATRON. Relationship of vitamin A to S^{35} metabolism in the baby pig, 189.

SCOTT, H. M. See Griminger, P., 429.
SCOTT, M. L. See Nesheim, M. C., 359.
Sheep, excretion of cesium-134 and potassium-42 in, influence of dietary potassium and sodium on, 655.
SIDDIQUI, M. K. R. See French, C. E., (Sup. 2) 1.
SIEVERT, A. H., AND P. H. PHILLIPS. Metabolic studies on the sodium fluoride-fed rat, 109.
Sodium (potassium and), dietary, influence of on cesium-134 and potassium-42 excretion in sheep, 655.
Sodium fluoride-fed rat, metabolic studies on, 109.
Soybean protein, autoclaved and ethylenediaminetetraacetic acid, effect of on the biological availability of dietary zinc for turkey poults, 313.
SPEER, V. C. See Diaz, F., 131; Frape, D. L., 173; 189; 333.
STALEY, M. G. See Thompson, E. M., 35.
Sterilization, radiation, effect of on the nutritive value of foods. IV. On the amino acid composition of garden peas and lima beans, 419.
S^{35} metabolism in the baby pig, relationship of vitamin A to, 189.
SWENDSEID, M. E., R. J. FEELEY, C. L. HARRIS AND S. C. TUTTLE. Egg protein as a source of the essential amino acids. Requirement for nitrogen balance in young adults studied at two levels of nitrogen intake, 203.
SWIFT, R. W., G. P. BARRON, K. H. FISHER, R. L. COWAN, E. W. HABTSOOK, T. V. HERSHBERGER, E. KECK, R. P. KING, T. A. LONG AND M. E. BERRY. The utilization of dietary protein and energy as affected by fat and carbohydrate, 281.

TAYLOR, M. W., AND J. B. ALLISON. Walter Charles Russell (October 1, 1892 — March 16, 1954), 7.
Temperature, high environmental, effect of on basal metabolism and serum ascorbic acid concentration of women, 35.
—, low environmental, effect of on the weight and food consumption of riboflavin-deficient rats, 485.
THOMPSON, E. M., M. G. STALEY, M. A. KIGHT AND M. E. MAYFIELD. The effect of high environmental temperature on basal metabolism and serum ascorbic acid concentration of women, 35.
Thyroid function in the young pig and its relationship with vitamin A, 333.
TOMARELLI, R. M., N. MINNICK, E. D'AMATO AND F. W. BERNHART. Bioassay of the nutritional quality of the protein of human and cow's milk by rat growth procedures, 265.

Treadwell, C. R. See Vahouny, G. V., 495.
Triglycerides, partial glycerides and free fatty acids, gastrointestinal digestion of fat in dogs fed, 393.
Tsien, W. S., and B. C. Johnson. The effect of radiation sterilization on the nutritive value of foods. IV. On the amino acid composition of garden peas and lima beans, 419.
Tubis, M., N. Baker and W. H. Blahd. Vitamin therapy in mice with an hereditary myopathy (*Dystrophia muscularis*), 595.
Turkey poults, biological availability of dietary zinc for, effect of autoclaving soybean protein and the addition of ethylenediaminetetraacetic acid on, 313.
Tuthill, S. See Barnes, R. H., 121.
Tuttle, S. C. See Swendseid, M. E., 203.

Vahouny, G. V., D. F. Flick, H. M. Gregorian and C. R. Treadwell. Nutrition studies in the cold. III. Effects of cold environment on cholesterol fatty livers, 495.
Vander Noot, G. W. See Barth, K. M., 383.
Van Reen, R., with the technical assistance of K. F. Glassford and J. P. Zagrofsky. The specificity of the molybdate-sulfate interrelationships in rats, 243.
Vaughan, D. A., and L. N. Vaughan. The effect of a low environmental temperature on the weight and food consumption of riboflavin-deficient rats, 485.
Vaughan, L. N. See Vaughan, D. A., 485.
Vidović, V. See Buzina, R., 465; Horvat, A., 647.
Viscera, abdominal, changes in total nitrogen content in fasting and realimentation, 633.
Vitamin A (potassium iodide and) effect of on the thyroidal uptake and urinary excretion of I^{131} in goitrous subjects on the island of Krk, 647.
— —, relationship to S^{35} metabolism in the baby pig, 189.
— — requirement of the baby pig, 173.
— —, thyroid function in the young pig and its relationship with, 333.
— B, effects of a deficiency of on salt toxicity in the rat, 231.
— (B) interrelationships in growing rats, studies on, 473.
— B_6 content of a packaged army ration, effect of storage on, with a note on the human requirement for the vitamin, 323.
— — deficiency in pregnant rats, induced by isonicotinic acid hydrazide, some effects of, 561.
— — — in the rat, effect of dietary fat on the development of, 25.
— — -deficient rats, changes in hemoglobin, hematocrit and plasma protein during pregnancy, 551.
— B_{12} deficiency in infant rats, pathology of, 343.
— — -methionine interrelationships, effect of dietary fat on, 371.
— — (Methionine, homocystine, choline, folic acid and) in the nutrition of the mouse, 141.
— —, radioactive, uptake and turnover of in rabbit tissues, 297.
— E-deficient chicks, alterations in some biochemical constituents of skeletal muscle of, 359.
— K. Effect of the prevention of coprophagy in the rat. VI, 603.
— therapy in mice with an hereditary myopathy (*Dystrophia muscularis*), 595.
